

Python Program 2 – Area of a Triangle

Program

```
base = float(input("Enter the base of the triangle: "))
height = float(input("Enter the height of the triangle: "))
area = 0.5 * base * height
print("The area of the triangle is:", area)
```

Sample Input

```
Enter the base of the triangle: 10
Enter the height of the triangle: 5
```

Sample Output

```
The area of the triangle is: 25.0
```
