

Python Program 4: LCM of Two Numbers

Program

```
def lcm(a, b):  
    greater = max(a, b)  
    while True:  
        if greater % a == 0 and greater % b == 0:  
            return greater  
        greater += 1  
  
num1 = 12  
num2 = 18  
  
print("LCM =", lcm(num1, num2))
```

Output

LCM = 36
