

Python Program 6 – LCM of Two Numbers

Program

```
num1 = int(input("Enter first number: "))
num2 = int(input("Enter second number: "))
greater = max(num1, num2)

while True:
    if greater % num1 == 0 and greater % num2 == 0:
        lcm = greater
        break
    greater += 1

print("LCM of", num1, "and", num2, "is", lcm)
```

Sample Input

```
Enter first number: 12
Enter second number: 18
```

Sample Output

```
LCM of 12 and 18 is 36
```
