

Program 7 – Reverse a List

Answer / Python Program

```
lst = [1, 2, 3]
lst.reverse()
print(lst)
```

Output

```
[3, 2, 1]
```

Note: The programs were formatted as working Python programs. The triangle program uses the complete area formula $\frac{1}{2} \times \text{base} \times \text{height}$, and the maximum-number program avoids recursive shadowing of Python's built-in `max()`.
