

Python Program 7: Sum of Digits

Program

```
def sum_digits(n):  
    s = 0  
    while n > 0:  
        digit = n % 10  
        s = s + digit  
        n = n // 10  
    return s  
  
num = int(input("Enter a number: "))  
print("Sum of digits =", sum_digits(num))
```

Output

```
Sample input: 12345  
Enter a number: 12345  
Sum of digits = 15
```
